

Teamwork Agreement Template

For the MathWorks Classroom Challenge Projects

Project: **Modeling and Analyzing a Battery Charging Profile**

Team Name: **Team 11**

Instructor: **Kevin Graham**

Program/Class: **Engineering Pathway Program**

Members and Roles

1. **Mia Hernandez**
2. **Laura Lazzarotto Bosque**

1) Purpose & Scope

We agree to collaborate to deliver a high-quality, ethical, and reproducible project. Our work will follow the project guidance and produce the specified artifacts (e.g., plots, code, and visualizations).

2) Roles & Responsibilities

- Project Manager (PM): Schedules meetings; maintains timeline; ensures tasks are tracked, and disagreements are resolved.
- Modeling Lead: Owns core MATLAB models/simulations
- Analysis/Validation Lead: Performs hand calculations and cross-checks simulation outputs
- Documentation & Visualization Lead: Compiles report (with figures/tables), prepares slides (if needed), and builds visual artifacts (e.g., animations or plots)

- Quality Assurance & Reproducibility Lead: Enforces coherent style across artifacts, ensures work is not overwritten across different versions, ensures data quality, tests/re-runs codes to ensure robustness and reproducibility

3) Communication Norms

- Primary channel: **Discord** (e.g. Slack)
- Secondary channel: **Phone number** (e.g. E-mail for summaries/decisions)
- Response time: **within 24 hours on weekdays and within 48 hours on weekends** (e.g. within 24 hours on weekdays; within 48 hours on weekends)
- Meeting cadence: **???** (e.g. weekly working meeting (60–90 minutes on Tuesdays via Zoom))
- Decision records: **Minutes and Google Docs** (e.g. PM logs major decisions in a running document)

4) Collaboration & Tools

- Version control: **one shared GitHub repo and Google Drive folder** (e.g. one shared GitHub repo or Google Drive folder)
- Data management: All datasets, parameters, and assumptions documented in **README.md** (e.g. README.md)

File naming & style: **descriptive names with Snake_case for scripts** (e.g. Snake_case, descriptive names)

- Backups: **Google doc files** (e.g. PM tags old versions according to numbered system)

5) Quality Standards (Definition of 'Done')

- **The design matches the project description**
- **Code is tested start to finish**
- **All assumptions, units, and references are documented**

e.g. Requirements meet project description, code is reproducible (runs from the README.md file, all specified figures regenerate, at least one teammate has tested edge cases, all assumptions, units, and references are documented in report)

6) Timeline & Milestones

- Week 1: **Set up the GitHub repository, review project info, and organize dataset/parameters.**
- Week 2: **Complete hand calculations and create the initial MATLAB code.**
- Week 3: **Finalize and test the code to ensure it meets all project requirements.**
- Week 4: **Finalize the report, create slides, clean up the GitHub repository, and rehearse for presentation.**

(e.g., Week 1: Problem framing, literature/background review, dataset/parameters, Week 2: First pass models (hand calculations + baseline MATLAB scripts); initial plots/visuals.

Week 3: Validation and quality assurance

Week 4: Report, slides, presentation rehearsal, repository cleanup)

7) Decision-Making & Conflict Resolution

- Default: **Group consensus through weekly meetings and discussion on Discord.** (e.g. consensus after discussion; PM facilitates)
- If blocked >48 hrs: **A majority vote so the team can move forward.** (e.g. Time-limited debate, majority vote, PM documents decision)
- Technical disagreements: **Evidence-based comparison before taking a vote.** (e.g. Evidence-based comparison before vote)
- Escalation: **If unresolved, consult instructor/mentor with a concise memo.**

8) Workload, Accountability & Attendance

- Task board: **Keep a simple to-do list with due dates pinned in our Discord server.** (e.g. To-Do / Doing / Review / Done with owners and due dates documented in README.md)
- Accountability: **If someone misses a deadline, just message the group chat to figure out a new plan within 24 hours.** (e.g. Missed deadline → recovery plan within 24 hrs; repeated misses trigger role redistribution.)
- Attendance: **Give at least a 2-hour notice if you will miss a meeting and share your updates in Discord.** (e.g. If you'll miss a meeting, give 24-hour notice and share updates asynchronously.)

10) Accessibility & Inclusion

We commit to respectful collaboration, equitable turn-taking, and flexibility for documented accessibility needs.

11) Deliverables Checklist

- **MATLAB code and README complete**
- **Hand calculations for both designs to cross-validate**
- **Clean GitHub repository**
- **Presentation slides and final figures/visuals**

(e.g. Code repository with clear structure and README, hand calculations linked to modeled results for cross-validation, specific figures & visualizations, final report with specified sections)

12) Agreement & Signatures

Name & Signature: **Mia Hernandez** Date: **7/9/26**

Name & Signature: **Laura Lazzarotto Bosque** Date: **7/11/26**
